

Inspire your class or group about the plants and animals to be found in their local environment with education programmes at The Wildwood Trust

Discover Education at Wildwood

Wildwood Trust, Herne Common, Nr Canterbury CT6 7LQ Reg. Charity No 1093702 www.wildwoodtrust.org

* Award winning
* Curriculum based
* Nationally recognised

Primary Foundation/KS1/KS2

Come on a **guided tour** through the woods and see Animal Homes such as a badger sett, beaver lodge or squirrel drey, find out about Habitats and learn about Adaptation whilst watching animals that climb, fly, burrow, hunt and hide.

Get up close with an animal while finding out all about it from one of our expert tutors in a Meet an Animal session. Or book one of our wide selection of workshops, covering topics from Teeth and Skeletons to Senses and Colour and Camouflage.

Get hands-on with animal artefacts, show off your acting skills in role play or make a craft to take home.

Secondary KS3/KS5

Test your investigative skills in CSI: Wildwood, our award-winning woodland murder mystery. Use your knowledge of food chains and adaptation to discover the killer in our most popular workshop.

Bored with the school playing field for **Ecological Sampling?** Get out into an ancient woodland and sample different stages of coppiced woodland or compare pine forest with broadleaf coppiced woodland using varied sampling techniques.

Think you know all about Adaptation? **Get hands-on** in our team event designed to test your knowledge. Handle skulls, antlers, horns and skins while you battle to earn points.

Looking for something different?

We can design workshops especially for your class if you have a particular topic you would like us to cover; we can differentiate for age and ability. Please just ask!

Sixth Form A level / IB

Ecological sampling techniques and species conservation schemes at A level and IB are where we excel.

With an ancient woodland as our backdrop and some of the UK's leading captive breeding and reintroduction schemes on site, we bring ecology topics to life.

We offer practical experience in quadrats, transects, small mammal trapping, habitat comparisons, invertebrate sampling, Lincoln Index, statistics and beach ecology.

We also offer workshops on endangered species captive breeding and reintroduction, rewilding and the role of zoos in conservation.

Outreach for all key stages

Can't get to Wildwood? We'll come to you!

Our Outreach service offers a wide range of curriculum-based workshops run by experienced Wildwood tutors.

We bring conservation to your classroom through hands-on activities including handling natural artefacts such as teeth, skulls and antlers.

Workshops can be tailored to all key stages and abilities. Find out all about Bees or Green Plants, get up close with real Animal Homes or even learn to Talk like a Wolf.

Call or email the education team now to discuss your needs.
